

## Our Harvest

Father God, you entrusted our amazing world to us with its plentiful resources for all to share.

Forgive us that we have not taken better care of your creation

And have inflicted damage to others and the environment through our striving to control the world around us

We sow, we reap

Forgive us when we have not tried to live in harmony with the world

And have used more than our share of the earth's resources at the expense of others

We sow, we reap

Help us sow the seeds for a new harvest.

Help us each to live responsibly and to be mindful of the impact of our actions on others

Help us to protect our environment , conserve water and energy

Help us to live lightly and reduce our carbon footprint

So that together we may become better stewards of this world and build a more just and sustainable future for all.
